PROFESSIONAL SUMMARY

Salesforce Solution Engineer and Technical Lead with 10+ years of experience delivering Salesforce solutions that improve operations, customer experience, and business efficiency. Experienced in working closely with business stakeholders to understand challenges, define requirements, and design practical Salesforce solutions across Sales Cloud, Service Cloud, Experience Cloud, and Field Service. Strong background in solution design, technical leadership, process optimization, and digital transformation, with hands-on experience leading large-scale Salesforce initiatives and cross-functional teams.

SKILLS

- **Salesforce Platforms:** Sales Cloud, Service Cloud, Field Service, Experience Cloud, Appointment Assistant, Work Capacity, Omnichannel Routing, Contact Center Operations
- **Solution Design & Consulting:** Solution Discovery, Business Requirements Gathering, Solution Architecture, Technical Consulting, Business Process Transformation, Solution Estimation, Stakeholder Workshops
- **Digital Transformation:** Salesforce Development & Configuration: Apex, Lightning Web Components (LWC), Flow Automation, SOQL, REST APIs, JavaScript, VS Code, Platform Configuration
- **Client & Stakeholder Engagement:** Executive Communication, Cross-Functional Collaboration, Stakeholder Management, Technical Presentations, Customer Enablement, Trusted Advisor Engagement
- **Delivery & Leadership:** Agile/Scrum, Technical Leadership, Backlog Grooming, Estimation & Planning, Mentorship, Solution Documentation, Process Optimization
- **AI & Innovation:** Salesforce AI Prototyping, AgentForce, Claude Code, Workflow Automation, AI-Assisted Process Optimization

CERTIFICATIONS

- Salesforce Certified Platform Developer 1
- Salesforce Certified Administrator
- Salesforce Certified JavaScript Developer 1

CORE EXPERTISE

- Salesforce Solution Design & Architecture
- Discovery Workshops & Business Requirements Analysis
- Business Process Transformation
- Salesforce Field Service Optimization
- Stakeholder Engagement & Executive Communication
- Technical Solution Consulting

-
- Digital Transformation & Platform Modernization
 - Process Automation & Operational Efficiency
 - Enterprise Integrations & Data Modeling
 - Agile Delivery & Cross-Functional Leadership
 - Solution Documentation & Technical Design
 - AI-Enabled Workflow Innovation

WORK EXPERIENCE

TELUS Digital – (Contract via York Digital Consulting Ltd) (September 2023 – May 2026)

Role: Salesforce Solution Architect | Tech lead

Key Responsibilities:

- Led solution design and technical initiatives for Salesforce Field Service supporting TELUS Smart Security & Automation operations.
- Worked closely with business stakeholders, operations teams, and developers to understand challenges, improve processes, and deliver Salesforce solutions that supported operational needs.
- Translated business requirements into practical Salesforce solutions for technician scheduling, appointment management, customer communication, and service operations.
- Acted as a trusted technical advisor by guiding solution discussions, evaluating trade-offs, and recommending scalable approaches based on business priorities.
- Defined technical requirements, solution approaches, and implementation strategies for Salesforce enhancements involving Apex, LWC, Flow automation, integrations, and platform configuration.
- Led solution workshops and technical discussions to improve workflows, platform performance, and customer experience.
- Designed and implemented scalable automation and optimization solutions supporting field operations, technician productivity, customer self-service, multilingual experiences, and reporting capabilities.
- Produced technical documentation including solution designs, process flows, data models, and implementation roadmaps to support successful delivery and stakeholder alignment.

Key Accomplishments:

- Independently led one of the earliest **Salesforce Work Capacity** implementations following Salesforce's official release, optimizing technician allocation, scheduling efficiency, and operational workload balancing.
 - Led end-to-end solution, configuration, and production rollout of **Salesforce Appointment Assistant**, enhancing customer self-service capabilities and technician live tracking
 - Devised a **Cross-Org Technician Routing** solution leveraging Salesforce APIs and External Objects to support workload sharing across independent operational teams.
 - Designed a **Technician End-of-Day Safety Compliance** solution aligned with Canadian workplace safety standards, incorporating automated safety check-ins, escalation workflows, and dispatcher emergency protocols.
 - Designed and implemented a **Bulk Service Appointment Cloning** framework to decompose long-duration field jobs into manageable sub-appointments
 - Proposed a secure public-facing **Job Status Tracking** solution with **future roadmap** support for self-service scheduling modifications and operational workload reduction.
 - Upgraded all public-facing Salesforce solutions to support **Multilingual experiences**
 - Evaluated & Demonstrated **AgentForce AI** capabilities for back-office automation
 - Developed innovative **Claude AI**-assisted **BI, Record Analysis** and **Code Review solutions** to improve business insights, process automation, and internal productivity.
-

-
- Lead the team to success in **TELUS Cafe Hackathon** within two weeks of AI adoption.

TATA CONSULTANCY SERVICES

INDIA(February 2015 – February 2022) / CANADA(March 2022 – September 2023)

Role: Technical Lead | Senior Consultant

Key Responsibilities:

- Led solution design and technical delivery of enterprise Salesforce solutions across Sales Cloud, Service Cloud, and Field Service implementations for global clients.
- Collaborated with distributed cross-functional teams across Canada, India, USA, and other regions to deliver enterprise-scale Salesforce integration and transformation initiatives.
- Participated in solution planning, technical design discussions, backlog grooming, estimation, roadmap planning, and Agile delivery management.
- Designed and developed scalable Salesforce applications using Apex, Lightning Web Components (LWC), Flows, REST integrations, and reusable framework components.
- Worked closely with enterprise architects, business stakeholders, and technical teams to define scalable architecture strategies and implementation roadmaps.
- Designed and implemented secure access models, sharing rules, permission structures, and governance controls aligned with enterprise compliance standards.
- Led integration initiatives involving Salesforce, SAP, Oracle, Informatica, and external enterprise systems.
- Conducted technical design reviews, code reviews, solution optimization, and mentoring activities across development teams.
- Produced architecture documentation including conceptual designs, integration diagrams, technical specifications, and implementation artifacts.
- Supported enterprise modernization and operational efficiency initiatives through automation, reusable frameworks, and process optimization strategies.
