PROFESSIONAL SUMMARY

Salesforce Architect and Technical Lead with 12+ years of Salesforce expertise and 18+ years of enterprise technology experience delivering scalable enterprise solutions across Sales/Service/Experience Cloud, Field Service, Contact Center Operations, Omnichannel Routing and System Integrations.

Most recently, lead Salesforce initiatives within TELUS Smart Security & Automation operations, driving architecture, AI-enabled process innovation, scheduling optimization, operational automation, and Field Service transformation for commercial business operations.

Strong ability to bridge business and technology by collaborating with stakeholders, architects, operations teams, developers, and leadership groups to design scalable, secure, and business-aligned Salesforce solutions.

Bring experience spanning Salesforce solution design, administration, leadership, business analysis, and stakeholder consulting across globally distributed teams.

SKILLS

- Salesforce Platforms: Sales Cloud, Service Cloud, Field Service, Experience Cloud, Appointment Assistant, Work Capacity, Contact Center Operations, Omnichannel Routing
- Architecture & Integration: Solution Architecture, REST APIs, Data Modeling, Security Architecture, Integration Design, Governance Reviews
- Development: Apex, LWC, SOQL, JavaScript, Flows, VS Code, HTML/CSS
- Delivery & Leadership: Agile/Scrum, Stakeholder Management, Estimation & Planning, Team Leadership, Mentoring, Technical Documentation
- AI & Innovation: Claude Code, Gemini, OpenAI, Process Automation, Salesforce AI Prototyping

CERTIFICATIONS

- Salesforce Certified Platform Developer 1
- Salesforce Certified Administrator
- Salesforce Certified JavaScript Developer 1

CORE EXPERTISE

- Salesforce Solution Architecture
- Field Service Transformation
- Work Capacity & Appointment Assistant
- Enterprise Integrations & Data Modeling
- AI-Enabled Workflow Automation

-
- Operational Process Optimization
 - Security & Access Governance
 - Stakeholder Communication & Solution Consulting
 - Agile Delivery & Technical Leadership
 - Enterprise Documentation & Solution Design

PROFESSIONAL EXPERIENCE

TELUS Digital – (Contract via York Digital Consulting Ltd) (September 2023 – May 2026)

Role: Salesforce Architect | Analyst | Consultant

Key Responsibilities:

- Lead architecture, solution design, and implementation of Salesforce Field Service solutions supporting TELUS Smart Security & Automation commercial operations.
- Drive operational transformation initiatives focused on technician scheduling optimization, Work Capacity management, Appointment Assistant, automation, and customer experience enhancement.
- Collaborate with business stakeholders, operations teams, architects, and development teams to translate business requirements into scalable Salesforce solutions aligned with operational goals.
- Provide technical leadership and architectural guidance for Salesforce development initiatives involving Apex, LWC, Flow automation, integrations, and platform configuration.
- Design and implement scalable automation solutions supporting Field Service operations, appointment lifecycle management, case management, reporting, and cross-system data synchronization.
- Lead architecture discussions, process design reviews, and solution planning activities to ensure alignment with enterprise standards and long-term scalability.
- Design role-based access models, permission structures, and security configurations to maintain platform governance and data integrity.
- Conduct platform optimization and performance improvement initiatives focused on operational efficiency, scheduling reliability, and user experience enhancement.
- Produce architecture documentation including solution designs, process flows, data models, integration diagrams, and implementation roadmaps.
- Identify operational gaps and propose high-impact enhancements focused on automation, AI enablement, technician productivity, customer self-service, and process optimization.
- Evaluate emerging Salesforce and AI capabilities, including Claude Code and AgentForce, to identify opportunities for business innovation and operational efficiency improvements.

Key Accomplishments:

- Rapidly evaluated and operationalized **Claude Code**-driven AI workflows, leading architecture and technical solution, to Lead the team to success in delivery for **TELUS Cafe Hackathon** solution within two weeks of adoption.
 - Designed an AI-powered operational insights framework leveraging Salesforce and **Claude Code** capabilities to generate actionable **Business Intelligence dashboards** and operational recommendations.
 - Developed a **Claude** AI-driven Salesforce **Record Analysis Solution** capable of generating structured summaries, contextual insights, and operational recommendations for business users.
 - Implemented an extremely efficient **Claude**-based **Code Review solution** by taking over limitations of SF Code Analyzer
 - Independently led one of the earliest **Salesforce Work Capacity** implementations following Salesforce's official release, optimizing technician allocation, scheduling efficiency, and operational workload balancing.
-

- Led end-to-end architecture, configuration, and production rollout of **Salesforce Appointment Assistant**, enhancing customer self-service capabilities, technician live tracking, automated communication, and appointment visibility.
- Designed **Technician End-of-Day Safety Compliance** solution aligned with Canadian workplace safety standards, incorporating automated safety check-ins, escalation workflows, and dispatcher emergency protocols.
- Upgraded all public-facing Salesforce solutions to support **Multilingual experiences**, including job tracking portals, appointment assistant workflows, and technician compliance processes, enhancing accessibility and engagement for diverse customer groups.
- Designed and implemented a **Bulk Service Appointment Cloning** framework to decompose long-duration field jobs into manageable sub-appointments, optimizing technician allocation and operational tracking.
- Proposed a secure public-facing **Job Status Tracking** solution with **future roadmap** support for self-service scheduling modifications and operational workload reduction.
- Designed an **automation** framework for **Inspection Job scheduling** and dispatch operations to reduce manual intervention and improve scheduling efficiency.
- Devised a **Cross-Org Technician Routing** architecture leveraging Salesforce APIs and External Objects to support workload sharing across independent operational teams.
- Evaluated & Demonstrated **AgentForce AI** capabilities for back-office automation, sales enablement, and operational assistance while assessing Data Cloud governance and enterprise AI integration considerations.

TATA CONSULTANCY SERVICES

INDIA(February 2015 – February 2022) / CANADA(March 2022 – September 2023)

Role: Technical Lead | Senior Consultant

Key Responsibilities:

- Led architecture and delivery of enterprise Salesforce solutions across Sales Cloud, Service Cloud, and Field Service implementations for global clients.
- Collaborated with distributed cross-functional teams across Canada, India, USA, and other regions to deliver enterprise-scale Salesforce integration and transformation initiatives.
- Participated in solution planning, technical design discussions, backlog grooming, estimation, roadmap planning, and Agile delivery management.
- Designed and developed scalable Salesforce applications using Apex, Lightning Web Components (LWC), Flows, REST integrations, and reusable framework components.
- Worked closely with enterprise architects, business stakeholders, and technical teams to define scalable architecture strategies and implementation roadmaps.
- Designed and implemented secure access models, sharing rules, permission structures, and governance controls aligned with enterprise compliance standards.
- Led integration initiatives involving Salesforce, SAP, Oracle, Informatica, and external enterprise systems.
- Conducted technical design reviews, code reviews, solution optimization, and mentoring activities across development teams.
- Produced architecture documentation including conceptual designs, integration diagrams, technical specifications, and implementation artifacts.
- Supported enterprise modernization and operational efficiency initiatives through automation, reusable frameworks, and process optimization strategies.
